

Professional Summary

Full Stack Web Developer with hands-on experience in building responsive and scalable applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in JavaScript (ES6+), React.js, and developing reusable components with a strong understanding of DOM manipulation and RESTful APIs. Experienced in optimizing performance across devices and working with modern tools like Git, NPM, and Webpack. Adept at problem-solving, translating requirements into efficient solutions, and building high-performing user-focused applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, java, C++, Typescript

Frontend: React.js, HTML5, CSS3, Tailwind CSS, WordPress, Angular.js, Redux

Backend: Node.js, Express.js, Nest.js

Databases: MongoDB, MySQL

Tools & Concepts: Git, GitHub, Postman, VS Code, REST APIs, data structure and algorithm, SDLC, Agile, JSON Web Token (JWT)

Experience

Frontend Development Intern

IBM | Remote | Jul 2025 – Aug 2025

- ❖ Collaborated in a 5-member team to design and develop **responsive frontend components** using React.js, HTML, CSS, and JavaScript within an **Agile SDLC environment**.
- ❖ Translated complex user requirements and wireframes into accessible, modular, and reusable UI components.
- ❖ Supported **testing and debugging** processes to ensure cross-browser compatibility and performance optimization.

Full Stack Intern

UpToSkills | Remote | Mar 2025 – Jun 2025

- ❖ Led an **8-person core team** (coordinating across 30 developers) to develop an **AI-driven assessment platform** using React, Node.js, Flask, and MongoDB.
- ❖ Delivered **10+ key modules** including quiz generation, HR & candidate dashboards, analytics, and proctoring systems within a 3-month sprint.
- ❖ Reduced quiz setup time by **80%** through automated workflows integrated with the **Gemini AI API**.
- ❖ Encouraged team collaboration through sprint planning, task delegation, and regular code reviews.

Projects

Online Assessment Test – React, Tailwind CSS, Node.js, Flask, Gemini API

- ❖ Built a **role-based login system** (HR & Candidate) with secure authentication and database management.
- ❖ Integrated **Gemini API** to auto-generate 100+ quiz questions in under 20 seconds.
- ❖ Developed **real-time proctoring features** (webcam monitoring, tab detection, eye-tracking) to maintain test integrity.

Airbnb Clone – Node.js, Express.js, MongoDB, EJS, Tailwind CSS

- ❖ Implemented **CRUD operations** for property management with secure login/signup flows.
- ❖ Designed a clean, interactive interface allowing hosts to manage listings and guests to book accommodations.

Additional Projects:

- ❖ **Grocery Shop Website** – Cart & billing system with responsive UI.
- ❖ **Gemini Quiz Generator** – Added PDF/CSV export, categories, database persistence.
- ❖ **Solar System Simulation** – Interactive 3D visualization of planetary motion using **JavaScript (Canvas API/Three.js)**, enhancing learning through **real-time animations and orbit controls**.

Education

❖ M.C.A. (Software Engineering) | USICT, GGSIPU | 2024–2026 | **CGPA: 8.6**

❖ B.Sc. (Physical Science with Computer Science) | Rajdhani College, DU | 2020–2023 | **CGPA: 8.47**

❖ Senior Secondary (12th) | CBSE | 2019–2020 | **85%**
