

Discord Snowflake ID Setup & Orion Profile Update Guide

What is a Snowflake ID?

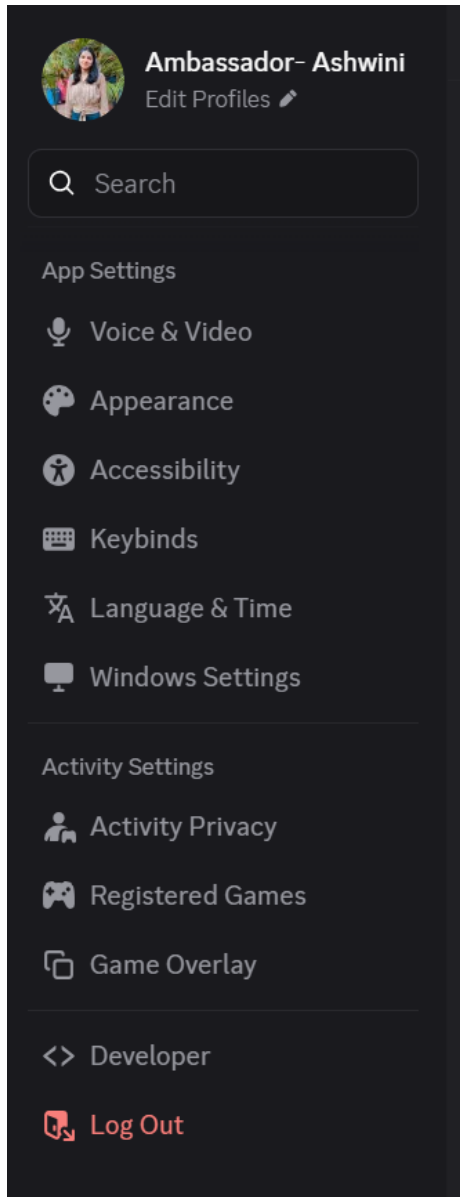

A **Snowflake ID** is a unique numeric ID assigned to every Discord user. It is required for identification in Orion.

Step 1: Enable Developer Mode in Discord

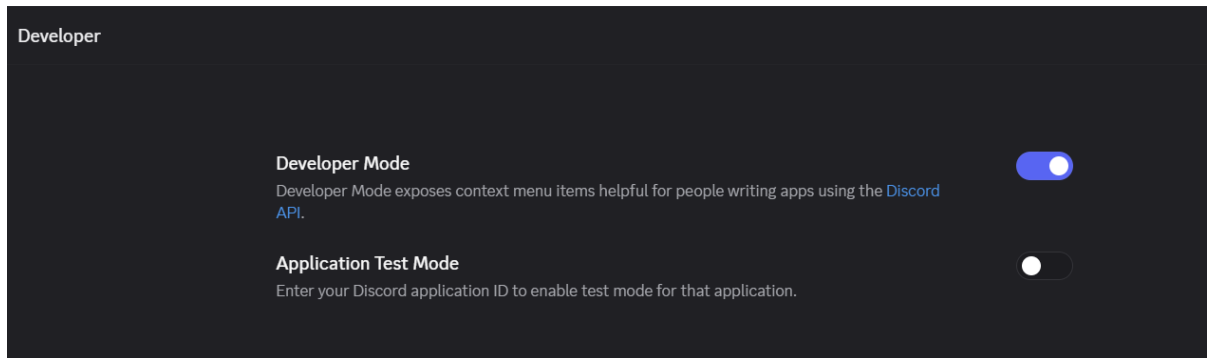

1. Open Discord
2. Click on **Settings** (⚙️) near your profile

3. Go to Developer

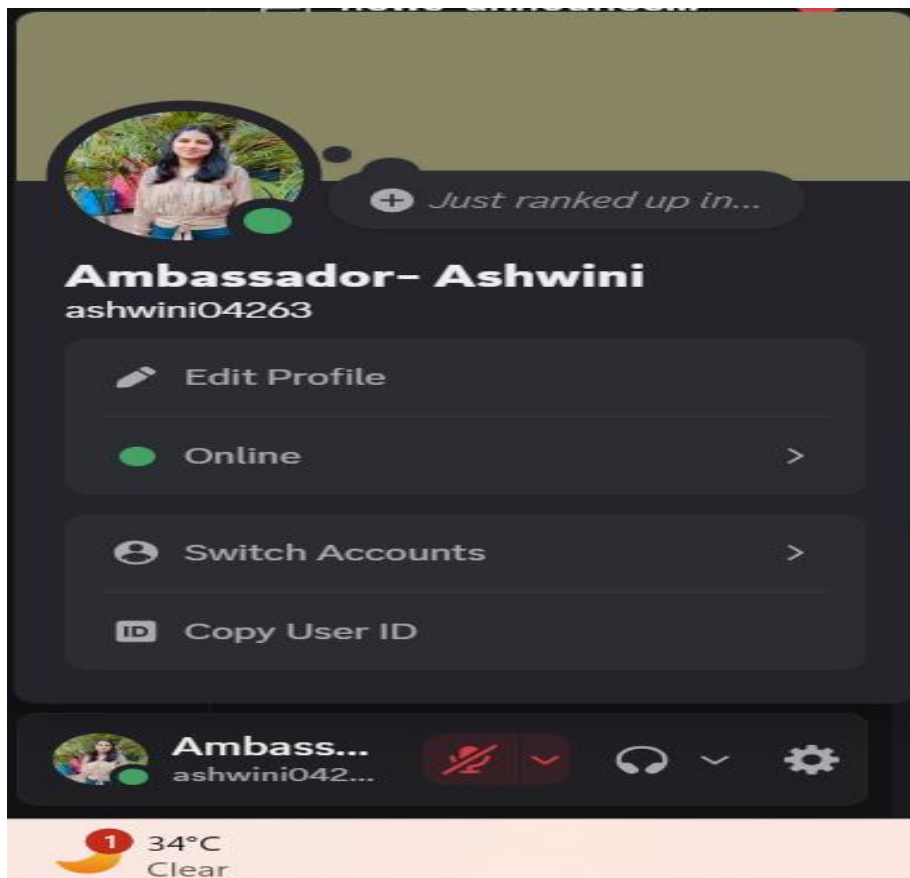

4. Turn ON **Developer Mode**

Step 2: Copy Your Discord Snowflake ID

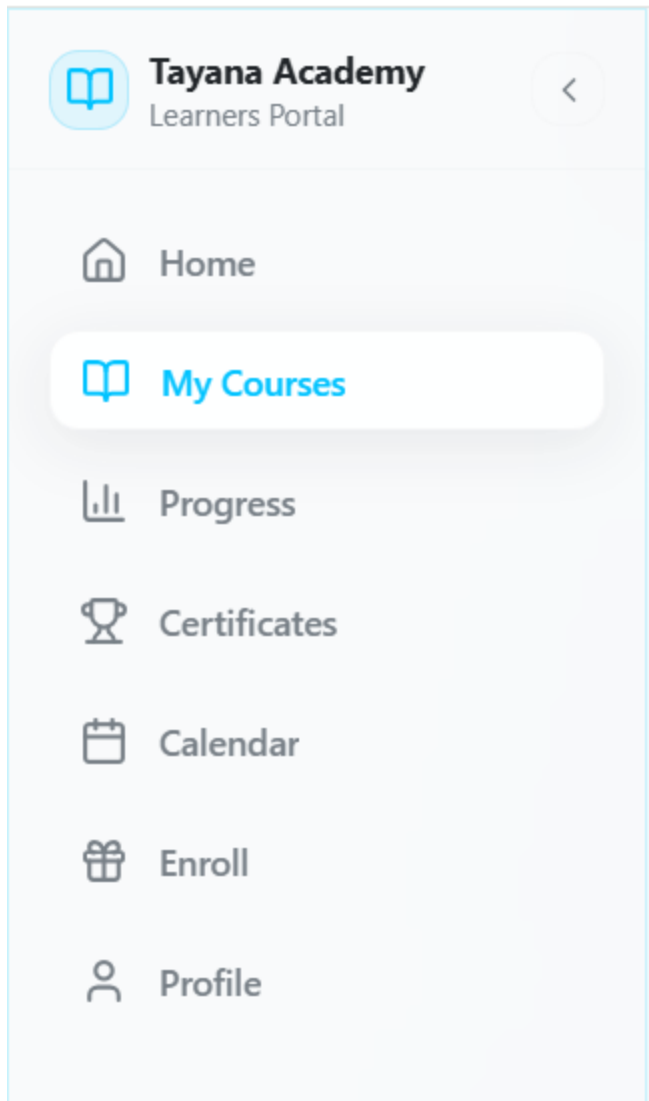

1. Go to your profile (bottom left corner)
2. Right-click on your username
3. Click **“Copy User ID”**

👉 This copied number is your **Snowflake ID**

Step 3: Update in Orion

1. Open your **Orion** profile

2. Go to the Personal Information section, locate the Snowflake ID field, paste your copied User ID, and click 'Verify'
